AUTHOR PLUS
You, the publisher

Overview

No publisher can meet the needs of all teachers and all students. That's where Author Plus comes in. This program enables you to create your own interactive activities, aimed at your students' exact needs, and to deliver them to your learners on a network, online or through an LMS / VLE. The program is easy to use, both for teachers and learners, and has a wide range of exercise types including multiple choice, gapfill, proof reading, text reconstruction and drag and drop.

Interface languages

English, Chinese, Spanish, French, Thai, Bahasa Malaysia, Swedish

Who is this for?

Author Plus is suitable for teachers who want to create their own interactive activities for their students. These can be delivered on a network, online and through an LMS / VLE.

What content can I create?

As a teacher, you have complete control over the content, and over the years teachers have made exercises for business English, vocabulary, listening and reading practice, exam preparation, other languages (German, French, Spanish, Chinese and Japanese) and even other subject areas.

A quick start

You could start by turning the paper-based exercises you have created in Word into interactive reading, speaking, writing and vocab activities. Author Plus includes an image bank and enables you to add your own graphics, audio and video files, and to link to PowerPoints and websites.

Extensive support

The program provides detailed teacher support: a full colour manual, context sensitive help and tutorials, so it's really quick and easy to get started. There is also a Results Manager, enabling you to manage students and generate activity reports.

Adapting other Clarity programs

You can also use Author Plus to add to and adapt Clarity content programs such as Tense Buster and Active Reading, bringing them directly in line with the interests and learning needs of your students.
